

SURYA KUMAR N

Full-Stack Developer (MERN | Python)

Tirunelveli, Tamil Nadu, India | +91 7448787643 | suryakumar132001@gmail.com

[linkedin.com/in/suriyakumar-developer](https://www.linkedin.com/in/suriyakumar-developer) | github.com/suriyakumar132001 | Portfolio

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on, production-grade experience across the MERN stack (MongoDB, Express.js, React.js, Node.js), complemented by Python-based development using Django and Flask. Skilled at translating business requirements into scalable, well-architected web applications, RESTful APIs, and secure authentication systems (JWT, Role-Based Access Control) within fast-paced, sprint-driven Agile environments.

Strong foundation in modern JavaScript (ES6+), responsive UI/UX design, clean and maintainable component architecture, and Git-based version control. Comfortable owning features end-to-end — from data modeling and API design through UI implementation, testing, and deployment — with a consistent focus on performance, security, and code quality. Quick to pick up new tools and frameworks, and equally effective working independently or collaborating closely with cross-functional teams of designers, backend engineers, and QA.

CORE SKILLS

- Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Web Design, Component-Based Architecture, React Hooks & State Management
- Backend: Node.js, Express.js, Django, Flask, RESTful API Design, MVC Architecture, JWT Authentication, Role-Based Access Control (RBAC)
- Databases: MongoDB (Mongoose, MongoDB Atlas), PostgreSQL, MySQL, Schema Design & Query Optimization
- Stack & Architecture: MERN Stack, MVC, Component-Based Architecture, Clean Code Principles, Scalable API Design
- Tools & Practices: Git, GitHub, VS Code, Firebase, Postman, Agile/Scrum, Code Reviews, CI/CD Fundamentals
- Integrations: Third-Party API Integration, Nodemailer, Twilio (SMS/Email Automation), Multer (File Uploads), Excel Import/Export

PROFESSIONAL EXPERIENCE

MERN Stack Developer — ICANIO Technologies

Feb 2026 – Present

Tirunelveli, Tamil Nadu

- Design and build scalable full-stack applications using MongoDB, Express.js, React.js, and Node.js, applying clean architecture principles and performance optimization techniques to keep the codebase maintainable as features grow.
- Develop RESTful APIs and implement secure authentication flows, ensuring endpoints are well-documented, validated, and protected against common security vulnerabilities.
- Integrate third-party services and APIs to deliver complete, end-to-end features, coordinating closely with backend and frontend components to ensure seamless data flow.
- Actively contribute to Agile ceremonies including sprint planning, stand-ups, and retrospectives, while participating in peer code reviews to maintain high code quality and shared team standards.
- Collaborate cross-functionally with designers, QA, and product stakeholders to translate requirements into technical solutions delivered on schedule.

Python Full Stack Developer Trainee — UNIQ Technologies

Aug 2025 – Jan 2026

Tirunelveli, Tamil Nadu

- Built full-stack web applications using a React.js frontend paired with Django and Flask backends, gaining hands-on exposure to both JavaScript and Python-based development ecosystems.
- Integrated RESTful APIs for smooth communication between frontend and backend layers, and handled database design and management to support core application features.
- Delivered a capstone Job Portal application featuring user authentication, an administrative panel, and full CRUD (Create, Read, Update, Delete) operations, built on a Python-based MVC architecture.

- Practiced structured development workflows, including version control with Git, iterative feature delivery, and functional testing prior to submission.

KEY PROJECTS

Insurance Policy CRM (MERN Stack)

Personal Project

Live: <https://crm-frontend-qupq.vercel.app/login>

A full-stack Customer Relationship Management platform built for vehicle insurance agencies to streamline policy management, lead tracking, and renewal automation — reducing manual, spreadsheet-driven processes with a centralized, role-secure web application.

- Architected the application using React.js, Node.js, Express.js, and MongoDB, with JWT-based authentication and Role-Based Access Control (RBAC) to govern permissions across user types.
- Built dedicated modules for Lead Management, Contact Management, Policy Management, and User Administration, alongside an interactive Dashboard Analytics view powered by Recharts for real-time visual reporting.
- Implemented AI-powered PDF scanning using the Anthropic Claude API to automatically extract and populate policy details, significantly cutting down manual data-entry time.
- Developed Excel import/export functionality for efficient bulk data handling, enabling agencies to migrate and manage large policy datasets with minimal friction.
- Automated policy renewal reminders via Nodemailer (email) and Twilio (SMS), improving customer retention and reducing missed renewals.
- Designed secure, well-structured RESTful APIs with Express.js and Mongoose, backed by MongoDB Atlas for reliable cloud data storage, and used Multer to handle file uploads such as scanned documents and policy attachments.

Full-Stack E-Commerce Application

MERN Stack

A complete e-commerce web application demonstrating end-to-end MERN stack proficiency, from catalog browsing and cart management to backend order handling.

- Built a responsive React.js frontend with reusable, component-based architecture to support a consistent and scalable UI across product listing, product detail, and checkout flows.
- Developed a Node.js/Express.js backend exposing RESTful APIs for product, cart, and order operations, backed by a MongoDB database for persistent storage.
- Structured the codebase for maintainability and reuse, applying consistent patterns across components and API routes to support future feature expansion.

EDUCATION

B.E. — Computer Science & Engineering

Oct 2019 – June 2022

Francis Xavier Engineering College, Tirunelveli | CGPA: 7.89

Diploma — Computer Science

Oct 2017 – June 2019

Sankar Polytechnic College, Tirunelveli | Percentage: 61%

CERTIFICATIONS & PARTICIPATIONS

MERN Stack Developer Certification

Urban Code

- Built full-stack applications using MongoDB, Express.js, React.js, and Node.js, covering the complete application lifecycle from data modeling to deployment.
- Implemented RESTful APIs, JWT-based authentication, and complete CRUD operations across guided project work.
- Developed responsive user interfaces using React Hooks and modern state management patterns.
- Worked with Git/GitHub for version control, branching strategies, and deployment workflows in a collaborative setting.
